

Interprofessional Education Simulation Series

Mixed Modalities

Program Description

Introduce and describe the concept of “mixed modalities” in the context of simulation. We will then demonstrate how a clinical procedure (starting an IV) can be taught using a “mixed modalities” approach.

**Thursday, February 25, 2010
12 noon till 1:30 p.m. EST**

Objectives

By the end of the program, participants will be able to:

1. Describe what is meant by “mixed modalities” in simulation.
2. Observe how mixed modalities can be used in the teaching of a clinical procedure.
3. Describe how the inclusion of mixed modalities enhances the learning experience.

Presenter

Dr. David Topps is an Associate Professor of Clinical Science and the Director of Clinical Informatics for the Northern Ontario School of Medicine (NOSM). He has been a Family Physician for 25 years with a background in rural, emergency, urban and academic practice. Dr. Topps has been working in informatics for 16 years, with emphasis on communications and ubiquitous computing, virtual patients, and simulation in interprofessional education.

Dr. Christine Kupsh is an Emergency Physician with extensive experience in teaching learners at all levels. She has served as the Clinical Director for the Integrated Distributed Educational Application of Simulation (IDEAS) project and is passionate about integrating simulation into a wide variety of learning environments.

The presentation will be held at NOSM's East Campus (Room 107) in Sudbury and video linked to NOSM's West Campus, (Room 1011) in Thunder Bay and through the Ontario Telemedicine Network (OTN). Tune in on the web and email your questions during the event by going to www.nosm.ca.

To register for this event prior to February 22, 2010, please contact:
